

Safe and Responsible

QGC aims to be an industry leader in HSSE performance.

A safe and secure working environment is fundamental to business success. We seek to protect our personnel, physical assets, community and the environment from harm. QGC will be open and transparent in Health, Safety, Security and Environmental (HSSE) practices and management. We will demonstrate our commitment to raising HSSE standards continually within the Company and in the CSG industry.

We believe:

- all injuries are preventable and everyone can identify and minimise risks to people, the environment and assets
- in going beyond compliance with regulations to meet or exceed international good practice on health, safety, security and environmental management
- in striving for continuous improvement in HSSE management
- in taking steps to minimise and prevent pollution and climate change
- in maintaining safe and secure work sites for staff, contractors and visitors aimed at eliminating work-related injury and illness
- if a job is not safe then it should not go ahead, and that we all have a duty to intervene to prevent incidents
- in ensuring our contractors understand the HSSE requirements to work with QGC and are aware of the consequences of non-compliance

We act by:

- communicating this Policy to staff and contractors and providing education and channels to report risks and hazards
- making management decisions which provide resources to implement this Policy
- monitoring our performance through a framework of objectives and targets
- consulting staff and key stakeholders when developing and reviewing HSSE standards
- incorporating best available techniques in equipment design and selection
- striving to influence our joint venture and industry partners to achieve greater HSSE performance
- implementing processes to monitor contractor HSSE performance

As a maturing company in Queensland's emerging coal seam gas industry, QGC will play a leadership role in setting and achieving standards expected by the public and regulators. To achieve this, QGC will communicate to all staff and contractors so that they recognise HSSE as everyone's responsibility and understand what this public statement of intent means to individuals and work teams.

This Policy statement reflects my personal commitment to making QGC safe for our employees, the communities in which we work and for the environment to ensure we have a long and successful business. As we mature our business I expect to see our risks clearly identified and reduced in line with this Policy. This Policy will be reviewed annually.

Catherine Tanna, Managing Director

July 2010
